Detailed Web Accessibility & Compliance Report

Covers compliance for:
ADA, AODA, EN-301-549, RGAA, and others

Generated Jul 22, 2025

For <https://skandia.co>

UserWay's AI-Powered Accessibility Widget leverages artificial intelligence (AI), Machine Learning (ML), and computer vision technologies to support compliance and accessibility efforts. These automated technologies, coupled with human review and approvals ("Human in the Loop"), are designed to help your site align with WCAG guidelines.

This report provides insights into the site's accessibility progress with its comprehensive list of the issues identified as of the date of report generation.

UserWay's software continuously monitors and addresses accessibility issues detected on this site based on UserWay's WCAG Automated Remediation Technology (ART). UserWay aims to apply the latest requirements, rule bases, and updates as the W3C (the World Wide Web's standards body) releases new WCAG guidelines and adapts existing guidelines to evolving technologies, browsers, and devices. WCAG is widely recognized as a foundation for legal accessibility requirements under frameworks such as the ADA, AODA, EN 301 549, RGAA, and other regulations around the world.

For additional information about this report, the WCAG rule base, or UserWay's full suite of accessibility and compliance solutions, please visit UserWay.org or contact compliance@userway.org.

Accessibility Violations by WCAG Criteria

Image lacks a required 'alt' attribute (Level A)

Checks that each image has an alt attribute with a sufficiently clear and concise description to convey the meaning of the image to visually impaired users relying on screen readers and other assistive technologies.

URL	545 Occurrences	Status	Detected on
skandia.co/	4	Remediated	Desktop
skandia.co/blog	7	Remediated	Desktop
skandia.co/home	2	Remediated	Desktop
skandia.co/en/home	4	Remediated	Desktop
skandia.co/es/home	4	Remediated	Desktop

Identical img 'alt' values for different images (Level A)

Checks that each unique image has a unique alternative text (alt) value. Different images — meaning images with different src attributes — should not have identical alt values.

URL	6 Occurrences	Status	Detected on
skandia.co/es/inversiones	6	Remediated	Desktop

The 'alt' attribute contains extraneous text (Level A)

Checks that each alt attribute contains no extraneous text. When writing alt text, describe only the content's meaning or function. There is no need to identify that content as a photo of..., icon of..., graphic of..., illustration of..., and inclusion of any file names, such as IMG_2905.JPG, should be avoided.

URL	2 Occurrences	Status	Detected on
skandia.co/es/inversiones	2	Remediated	Desktop

List group lacks any list items (Level A)

Checks for list items within list wrapper elements. If any or element is present, it should contain at least one element. If any <dl> element is present, it should contain at least one <dt> element.

URL	1 Occurrences	Status	Detected on
skandia.co/seguros-de-vida/seguro-de-pensiones-crea-patrimonio	1	Requires manual remediation	Desktop

Missing 'tabindex='0'' attribute (Level A)

Checks that non-interactive elements with mouse or keyboard handlers have a `tabindex='0'` attribute. Users should be able to navigate using only a keyboard in a logical and sequential way. Navigating with a keyboard should mirror the visual order of the navigation and controls found on that page. Anyone using keyboard navigation will expect to move sequentially from left to right and top to bottom to navigate throughout the page. When any element has a mouse or keyboard handler, adding the `tabindex='0'` attribute aids in smooth keyboard navigation.

URL	1 Occurrences	Status	Detected on
skandia.co/seguros-de-vida/seguro-de-pensiones-crea-patrimonio	1	Remediated	Desktop

Frame lacks a populated 'title' attribute (Level A)

Checks that all frames have populated title attributes. Users who rely on screen readers or other assistive technologies often use shortcut navigation methods to view a list of frames and their title attributes. A descriptive title attribute that identifies the frame's content or purpose helps these users.

Link lacks descriptive text (Level AAA)

Checks that each link contains descriptive text that clearly and meaningfully describes what will happen if the user selects it. Without descriptive text, a link can confuse users who rely on screen readers or other assistive technologies. If it is not possible to add link text, add an `'aria-label'` attribute to describe the link instead. Or, if the link is necessary for the programming or functionality of the page but is not intended for user interaction, add an `'aria-hidden'` attribute to hide it from screen readers.

Links with identical targets have different descriptive text (Level AA)

Checks that links with identical href attributes have identical descriptive text (link text). When multiple links to the same target exist, the descriptive text for each should be identical to avoid confusing users who rely on screen readers or other assistive technologies.

URL	8 Occurrences	Status	Detected on
skandia.co/seguros-de-vida/seguro-de-pensiones-crea-patrimonio	8	Remediated	Desktop

Page should have a single <h1> element (Level AA)

Checks that the page has a single <h1> element. Structuring pages with a logical and predictable heading hierarchy allows users to easily find information and more efficiently navigate the page. Users relying on screen readers and other assistive technologies should be able to understand the page structure by quickly skimming the page. Each page should have a single <h1> element under which all subsequent headings (<h2>, <h3>, etc.) should semantically fit.

Heading level skipped (Level AA)

Checks that headings are used hierarchically without skips. Structuring pages with clear, descriptive headings allows users to easily find information and more efficiently navigate the page. Create a logical and predictable heading hierarchy, beginning with an <h1> element. Under the <h1> should be one or more <h2> elements. Under each <h2> should be one or more <h3> elements and so forth. Levels should not be skipped. An <h1> element should not be followed by an <h3>, for example, with no intermediate <h2> element.

Form field lacks a <label> element (Level AA)

Checks that each form field has an associated <label> element or descriptive text. Without labeling or description, users who rely on screen readers or other assistive technologies cannot determine the input requested.

Duplicate 'id' values (Level A)

Checks that every id attribute on a page is unique. Assistive technologies for both blind and mobility-impaired users need unique id values to interact with the page.

URL	9 Occurrences	Status	Detected on
skandia.co/es/inversiones	2	Requires manual remediation	Desktop
skandia.co/seguros-de-vida/seguro-de-pensiones-crea-patrimonio	7	Requires manual remediation	Desktop

Element lacks adequate color contrast (Level AA)

Checks for a contrast ratio of 4.5:1 between text and background. Any text (or image that contains text) must have a color contrast ratio of 4.5:1 or higher for small to normal-sized text to be readable by users with low vision and to meet WCAG AA level guidelines. For larger text, the contrast ratio must be 3:1 or higher. To meet WCAG AAA level guidelines, the contrast ratio must be 7:1.

New tab or window opens without warning user (Level AAA)

Checks for new tabs or windows opening without warning user. New tabs or windows can be very disorienting for users, particularly those who rely on screen readers or other assistive technologies. Any link that opens a new tab or window should communicate this fact beforehand.

Vague or undetermined link purpose (Level A)

Checks for vague link text that does not provide clear information on where the link leads to. Users who rely on screen readers or other assistive technologies often skip forward or backtrack to locate links. They need link text to be substantive. Vacuous, meaningless link text like click here, click this, download, etc. tell users nothing about what the link points to.

Skip link missing for user to skip navigation or other repetitive content (Level A)

Checks for a mechanism that allows users to skip navigation and other repetitive content atop each page. Most websites repeat the main navigation or other content (banner links, etc.) at the top of each page. For users who navigate with a keyboard or other assistive technologies, having to tab through such repetitive content on each page is laborious, time-consuming and considered an accessibility barrier.

Video begins playing automatically after page load (Level A)

Checks for automatically playing video. Any video that plays automatically upon page load causes a plethora of accessibility problems (in addition to annoying most non-disabled users). Any accompanying audio interferes with screen readers, making it difficult or impossible for blind users to find and stop playback. Users with mobility impairment must find and navigate to the video to stop playback. And users with cognitive impairment can become confused and unable to continue using the site.

URL	1 Occurrences	Status	Detected on

Focusable element detected within element with aria-hidden='true' attribute (Level A)

Checks for a focusable element within another element that has an aria-hidden='true' attribute. Any element that can receive focus is typically interactive and often performs an important function. If aria-hidden='true' is applied to a parent element containing the focusable element, screen readers will ignore the focusable element. Users who rely on screen readers will be able to navigate to the focusable element but will not receive any description of what function that element serves.

Element lacks semantic markup. (Level A)

Words or phrases intended to carry semantic weight or emphasis should be marked up with or (emphasis) elements, not with (bold) or <i> (italics). When semantically special treatment is intended, the semantic elements will both change the visual appearance and the intonation of the words when spoken by a screen reader. The and <i> elements will change only the visual appearance, not the spoken intonation.
